

**Facilitator:** Edwin Eliasson

**Participants:** Joakim Agnemyr, Edwin Eliasson, Viktor Valadi, Mona Kilsgård

**Not in attendance:**

**Date:** 02/10/2018

## **Meeting Agenda**

### **§1 Objectives**

- We need to discuss what the new GUI will look like.
- We need to discuss how we are chain calling our methods in model and how to fix it.
- We need to discuss what plugins we should use.
- We need to discuss when we should write our RAD and SDD.

### **§2 Reports**

- We have all continued our work on the project since last meeting.
- Viktor has worked on the Order class and how it interacts with Group.
- Joakim added Observable and Observer to the project for the implementation of Observer pattern.
- Mona has implemented the use of id's for the classes. Updated Domain model and Design Model.
- Edwin has started working with SceneBuilder on the GUI for the application. Has also helped Joakim with the Observer pattern.

### **§3 Discussion Items**

1. What will our new GUI look like?
2. How do we minimize or avoid chain calling our methods in model?
3. What plugins should we use?
4. When should we write RAD and SDD?

### **§4 Outcomes and assignments**

#### **Outcomes:**

1. Mona and Edwin has come forth with an adaptation.
2. We have discussed this, whether it is good or not, and decided to check with Joel.
3. We will use JavaFX and JFoenix for our GUI in SceneBuilder.
4. We will start with it during the week.

#### **Assignments:**

1. Joakim will continue working on the chain calling in model and try to solve it. He will also start writing the SDD.
2. Viktor will continue implementing methods in Group affecting Order.
3. Edwin and Mona will be working on the GUI.

## **§5 End of Meeting**

Next meeting is 05/10-2018 08.00.
